IAFC – Firefighter Near Miss Program  
Attn: John Tippett, Program Manager  
4025 Fair Ridge Drive, Suite 300  
Fairfax, VA 22033-2868

Dear Mr. Tippett:

On behalf of the ISFSI and its Board, I would like to take this opportunity to formally acknowledge our support and endorsement of the Firefighter Near-miss Program.

Since the inception of this program three years ago, firefighters, fire officers and instructors from around the world have used the lessons learned from the near miss reporting program in an effort to reduce firefighter injuries and fatalities. These lessons and the strong emphasis you've placed on cultural change, crew resource management, and firefighter safety are form fitting to the ISFSI and our mission.

As the President of the ISFSI it's an honor and a privilege to express our support to you and your staff as we continue the relentless journey in search of the model ingredient for reducing firefighter injuries and fatalities nationwide.

Sincerely,

A handwritten signature in black ink, appearing to read "Timothy E. Sendelbach", is written over the word "Sincerely,".

President
